

2ND ANNUAL

Utah Coal Mine Safety Conference

Based in Salt Lake City, Utah, Marshall Radio is dedicated to the design and production of premium telemetry equipment for tracking and communication. They have already tested their wireless communication devices in four of the eight local mines here in Carbon, Emery and Sevier counties.

Cold Fire is an amazing universal fire suppressant that will extinguish class A & B, D and K fires - including tires, metals, hydrocarbon fuels like gas and diesel, and polar solvents like acetone and ethanol. It is completely non-toxic and biodegradable. Cold Fire has a unique ability to not only snuff out fuel fires, but to actually encapsulate the fuel, rendering it inert and preventing ignition.

Date:
September 15, 2009

**Location: Carbon
County Event Center
310 S. Fairgrounds Rd
Price, Utah**

Time: 12:00 PM – 4:30 PM
